

## What Should I do In PE Class?

PE teachers teach kids how to make their bodies move.

In order to learn, kids try to do what PE teacher tell them to do. That is called participating. Kids usually participate by doing these things:

1. listening to the teacher  
(picture)
2. trying to do what teacher says.  
(picture)
3. watching other kids and doing what they do.  
(picture)

The PE teacher is happy when kids participate.

Kids that participate usually get good grades from the PE teacher. Often, they get stronger and learn new movements and games.

I like getting good grades, getting stronger and learning new games. Those are good reasons to participate in PE. 😊
